SPECIAL SECTION ON THE SIXTH IEEE INTERNATIONAL WORKSHOP ON APPLIED MEASUREMENTS FOR POWER SYSTEMS

GUEST EDITORIAL

Guest Editor's Foreword Special Section on the Sixth IEEE International Workshop on Applied Measurements for Power Systems (AMPS 2015) Aachen, Germany, September 23–25, 2015 ................................................................. C. Muscas 2194

SPECIAL SECTION

Continuous Event-Based Harmonic Impedance Assessment Using Online Measurements ................................................................................. D. Serfontein, J. Rens, G. Botha, and J. Desmet 2214

Experimental-Based Evaluation of PV Inverter Harmonic and Interharmonic Distortion Due to Different Operating Conditions ........................................ R. Langella, A. Testa, J. Meyer, F. Möller, R. Stiegler, and S. Z. Djokic 2221

Real-Time Monitoring of Distribution System Based on State Estimation ................................................................................................. A. Angioni, J. Shang, F. Ponci, and A. Monti 2234

Impact of Acquisition Wideband Noise on Synchrophasor Measurements: A Design Perspective ................................................................. D. Macii, D. Fontanelli, G. Barchi, and D. Petri 2244

REGULAR PAPERS

A/D and D/A Conversion, Analog and Digital Instrumentation

Thermal Radiation Measurement With Thermoresistive Sigma–Delta Modulator .......................................................................................... V. da Conceição Rosa, A. Oliveira, and C. J. Gunther 2254

Analog and Digital Data, Image and Signal Processing

Ensemble EMD-Based Automatic Extraction of the Catenary Structure Wavelength From the Pantograph–Catenary Contact Force ........................................... Z. Liu, H. Wang, R. Dollevoet, Y. Song, A. Núñez, and J. Zhang 2272

NSCT-Based Infrared Image Enhancement Method for Rotating Machinery Fault Diagnosis ................................................................. T. Bai, L. Zhang, L. Duan, and J. Wang 2293

(Contents Continued on Page 2193)
Detection and Classification of Power Quality Disturbances Using Double Resolution S-Transform and DAG-SVMs .......................................................... J. Li, Z. Teng, Q. Tang, and J. Song 2302

Built-in Self-Test, Design-for-Testing, Fault Diagnosis and Fault-Tolerance
Fault Diagnosis Using a Joint Model Based on Sparse Representation and SVM .......... L. Ren, W. Lv, S. Jiang, and Y. Xiao 2313
A Testability Measure for DC-Excited Periodically Switched Networks With Applications to DC–DC Converters .............................................................. G. Fontana, A. Luchetta, S. Manetti, and M. C. Piccirilli 2321

Imaging Techniques and Instrumentation
Locating Faults With High Resolution Using Single-Frequency TR-MUSIC Processing ........ M. Kafal, A. Cozza, and L. Pichon 2342

Measurement Techniques
High-Precision FIR-Model-Based Dynamic Weighing System ........................................ M. Niedźwiecki and P. Pietrzak 2349
Equilateral Measurement of Rotational Positions With Magnetic Encoders ........................ S.-T. Wu and Z.-L. Wang 2360
Selected Problems of k-Factor Estimation Related to the IEC Flickermeter’s Nonlinearity .......... M. Michalski and G. Wiczyński 2381

Metrology, Standards and Calibration
Suppression of Microwave Leakage Shifts in Fountain Clocks by Frequency Detuning ................ M. Kazda and V. Gerginov 2389

Nondestructive Evaluation and Remote Sensing

Sensors, Sensor Fusion and Transducers
Small and Practical Optical Fiber Fluorescence Temperature Sensor ........ Y. Zhao, M.-Q. Chen, R.-Q. Lv, P. Wang, and X. Feng 2406

Signals, Systems and System Identification
A Two-Stage Fault Detection and Isolation Platform for Industrial Systems Using Residual Evaluation .............................................................. M. Heydarzadeh and M. Nourani 2424
