EDITORIAL
Editor-in-Chief’s Year-End Message ................................................................. A. Ferrero
Message From the Incoming Editor-in-Chief .................................................. S. Shirmohammadi

LIST OF REVIEWERS
2016 Reviewers List .........................................................................................

REGULAR PAPERS
Algorithms, Artificial Intelligence, SOFT Computing and Informatics
A New Method Based on Stochastic Process Models for Machine Remaining Useful Life Prediction .......................................................... Y. Lei, N. Li, and J. Lin

Instrumentation for Measurement in Communications
A Novel Method for Phase Noise Measurement Based on Cyclic Complementary Autocorrelation .... M. D’Arco and L. De Vito

Uncertainty Analysis, Accuracy, Precision and Parameter Estimation
Wavelet-Based Improvements for Inertial Sensor Error Modeling ....................... S. Guerrier, R. Molinari, and Y. Stebler
Uncertainty Issues in Direct and Indirect Efficiency Determination for Three-Phase Induction Motors: Remarks About the IEC 60034-2-1 Standard .................................................. G. Bucci, F. Ciancetta, E. Fiorucci, and A. Ometto
Efficient Implementation of Least Squares Sine Fitting Algorithms ...................... B. Renczes, I. Kollár, and T. Dabóčzi

Built-in Self-Test, Design-for-Testing, Fault Diagnosis and Fault-Tolerance
Internal Leakage Detection in Electrohydrostatic Actuators Using Multiscale Analysis of Experimental Data .......................... A. Maddahi, W. Kinsner, and N. Sepehri

Medical and Biomedical Instrumentation and Applications
Development of a Navigation Tool for Revision Total Hip Surgery Based on Electrical Impedance Tomography .................................. Z. Ren and W. Q. Yang

(Contents Continued on Page 2657)
Measurement Techniques

An In Situ Measurement System for Characterizing Orbital Debris .......................................................... M. A. Tsao, H. T. Ngo, R. D. Corsaro, and C. R. Anderson

The Effect of Amplitude Modulation on the Axial Resolution of Doppler-Based Ultrasonic Topography Measurement .......................................................... J. R. Gatabi, S. Das, and F. Forouzbakhsh

Minimum Circumscribed Circle and Maximum Inscribed Circle of Roundness Deviation Evaluation With Intersecting Chord Method .......................................................... F. Liu, G. Xu, L. Liang, Q. Zhang, and D. Liu

Networking, Networks and Sensor Networks

Optical Instrumentation, Measurement and Systems

3-D Reconstruction Algorithm of Flame Based on Inversion Calculation of Thermal Radiation .......................................................... Z. Wei, Y. Li, Z. Li, S. Song, and B. Li

RF, Microwave, Millimeter Wave and Tera-Hertz

Analysis of Nonideal Effects and Performance in Magnetic Positioning Systems .......................................................... V. Pasku, A. De Angelis, M. Dionigi, A. Moschitta, G. De Angelis, and P. Carbone

Sensors, Sensor Fusion and Transducers

Simultaneous Lever-Arm Compensation and Disturbance Attenuation of POS for a UAV Surveying System .......................................................... M. Zhong, Q. Cao, J. Guo, and D. Zhou

Fabrication and Characterization of an MOEMS Gyroscope Based on Photonic Bandgap Materials .......................................................... C. Trigona, B. Andò, and S. Baglio

Dynamic Multidimensional Scaling Algorithm for 3-D Mobile Localization .......................................................... W. Cui, C. Wu, W. Meng, B. Li, Y. Zhang, and L. Xie

Signals, Systems and System Identification

Nonautoregressive Nonlinear Identification of IPMC in Large Deformation Situations Using Generalized Volterra-Based Approach .......................................................... M. Annabestani, N. Naghavi, and M. M. Nejad

2016 INDEXES
