SPECIAL SECTION ON SENSOR APPLICATIONS SYMPOSIUM

EDITORIAL
Special Section on Sensor Applications ........................................D. Gurkan and S. Griffin 2338

SPECIAL SECTION PAPERS
Growth of Polypyrrole–Horseradish Peroxidase Microstructures for H2O2 Biosensor ........................................ P. K. Kathuroju and N. Jampana 2339
Wireless Measurement Electronics for Passive Temperature Sensor ........................................ E. Sardini and M. Serpelloni 2354
Neural Network-Based Interface Level Measurement in Pipes Using Peripherally Distributed Set of Electrodes Sensed Symmetrically and Asymmetrically ........................................ C. Pradeep, Y. Ru, and S. Mylvaganam 2362

REGULAR SECTION PAPERS
Algorithms, Artificial Intelligence, SOFT Computing, and Informatics
Energy-Efficient Compressive State Recovery From Sparsely Noisy Measurements ........................................ A. Tabibiazar and O. Basir 2392

A/D and D/A Conversion, Analog, and Digital Instrumentation
Blind Timing Skew Estimation Using Source Spectrum Sparsity in Time-Interleaved ADCs ........................................ Y. X. Zou and X. J. Xu 2401

Analog and Digital Data, Images, and Signal Processing
Low-Level Sinusoidal Signal Detection From a High-Resolution Virtual Spectral Image Using Autoregressive Vector Extrapolation ........................................ C. S. Marino and P. M. Chau 2413

Instrumentation for and Measurement in Communications
Determination of the Propagation Constant From Single-Ended Line Test Data ........................................ A. Fertner, D. Cederholm, and P. O. Börjesson 2422
Accurate One-Way Delay Estimation: Limitations and Improvements ........................................ A. Vakili and J.-C. Grégoire 2428

(Contents Continued on Page 2337)
# Instrumentation for and Measurement of Electric Power Systems, Energy Metering, and Electric Power Quality

- *A Subspace-Based Dynamic Phasor Estimator for Synchronphasor Application*  
  P. Banerjee and S. C. Srivastava  
  2436

# Images Techniques and Instrumentation

- *A Digital Image Stabilization Method Based on the Hilbert–Huang Transform*  
  K. Ioannidis and I. Andreadis  
  2446

# Mechatronics, Industrial Applications, and Robotics

- *Reconfigurable SoC-Based Smart Sensor for Wavelet and Wavelet Packet Analysis*  
  R. J. Romero-Troncoso, M. Pena-Anaya, E. Cabal-Yepez, A. Garcia-Perez, and R. A. Osornio-Rios  
  2458

# Medical and Biomedical Instrumentation and Applications

- *An Implementation of SOPC-Based Neural Monitoring System*  
  Q. Huang, S. Chang, J. Peng, X. Mao, Y. Zhou, and H. Wang  
  2469

# Measurement Techniques

- *A New Measurement System for the Perpendicular Complex Permittivity to DUT Sheet by Stripline Simulation*  
  H. Suzuki, T. Hotchi, and T. Nojima  
  2476

- *Measurement of Resistance and Capacitance of MOX Sensors With High Sampling Rate*  
  A. Depari, A. Flammini, and E. Sisinni  
  2483

# Metrology, Standards, and Calibration

- *A Holistic Self-Calibration Algorithm for xy Precision Metrology Systems*  
  C. Hu, Y. Zhu, J. Hu, M. Zhang, and D. Xu  
  2492

- *Three-Axial Accelerometer Calibration Using Kalman Filter Covariance Matrix for Online Estimation of Optimal Sensor Orientation*  
  T. Beravs, J. Podobnik, and M. Munih  
  2501

- *Traceable Technique to Calibrate Clamp Meters in AC Current From 100 to 1500 A*  
  F. Galliana and P. P. Capra  
  2512

- *Intelligent Selection of Calibration Points Using a Modified Progressive Polynomial Method*  
  S. Rahili, J. Ghaisari, and A. Golfar  
  2519

- *A Compensation Method With a Standard Square Wave for Precise DC Measurement of Mutual Inductance for Joule Balance*  
  J. Lan, Z. Zhang, Z. Li, Q. He, Y. Fu, S. Li, B. Han, J. Zhao, and Y. Lu  
  2524

# Networking, Networks, and Sensor Networks

- *Impacts of 2.4-GHz ISM Band Interference on IEEE 802.15.4 Wireless Sensor Network Reliability in Buildings*  
  W. Guo, W. M. Healy, and M. C. Zhou  
  2533

# Sensors, Sensor Fusion, and Transducers

- *Study of a Simple Linearization Technique of p-n-Junction-Type Anemometric Flow Sensor*  
  S. C. Bera and S. Marick  
  2545

- *A Flow Measurement Technique Using a Noncontact Capacitance-Type Orifice Transducer for a Conducting Liquid*  
  S. C. Bera and H. Mandal  
  2553

# Signal, Systems, and System Identification

- *An FPGA-Based Embedded Robust Speech Recognition System Designed by Combining Empirical Mode Decomposition and a Genetic Algorithm*  
  S.-T. Pan and X.-Y. Li  
  2560

# Time and Frequency Domain Circuits and Systems

- *Frequency Transfer in Electronically Stabilized Fiber Optic Link Exploiting Bidirectional Optical Amplifiers*  
  L. Śliweczyński, P. Krehlik, L. Buczek, and M. Lipiński  
  2573

- *A Multichannel High-Precision CMOS Time-to-Digital Converter for Laser-Scanner-Based Perception Systems*  
  J.-P. Jansson and V. Koskinen  
  2581

# Virtual Measurements and Systems and Synthetic Instrumentation

- *A General Automatic Test System for Instruments in IC Equipment*  
  X. Su and L. Tian  
  2591
