PART II OF TWO PARTS

2019 IEEE INTERNATIONAL SYMPOSIUM ON ROBOTIC AND SENSORS ENVIRONMENTS (ROSE)

GUEST EDITORIAL
Special Section on Robotic and Sensors Environments ......................................................... W. Gueaieb and C. Claudel XXXX

SPECIAL SECTION PAPERS

Controls and Control Systems Instrumentation and Measurement

REGULAR PAPERS

Algorithms, Artificial Intelligence, Soft Computing and Informatics
Fault Diagnosis of Complex Chemical Processes Based on Enhanced Naive Bayesian Method .............. G. Yang and X. Gu XXXX
Intelligent Fault Diagnosis via Semisupervised Generative Adversarial Nets and Wavelet Transform ................................................................................................................. P. Liang, C. Deng, J. Wu, G. Li, Z. Yang, and Y. Wang XXXX
Assessing the Impact of Spatial Proximity Data on the Solar Insolation Prediction ................................ S. Bae and S. D. Manshadi XXXX
Fast and Precise Positioning in PCBs Using Deep Neural Network Regression ................................. D.-M. Tsai and Y.-H. Chou XXXX
A Minimum Hitting Set Algorithm With Prejudging Mechanism for Model-Based Fault Diagnosis in Distribution Networks ................................................................. Q. Wang, T. Jin, M. A. Mohamed, and T. Chen XXXX
A Novel Approach Based on CEEMDAN to Select the Faulty Feeder in Neutral Resonant Grounded Distribution Systems ................................................................. T. Jin, F. Zhuo, and M. A. Mohamed XXXX

Acoustics and Ultrasonics Instrumentation and Measurements
Compressed Sensing Method for Health Monitoring of Pipelines Based on Guided Wave Inspection ................................................................................................................................. Z. Wang, S. Huang, S. Wang, S. Zhuang, Q. Wang, and W. Zhao XXXX

(Contents Continued on Page XXXX)
Analog and Digital Data, Image and Signal Processing
A New Self-Reference Image Decomposition Algorithm for Strip Steel Surface Defect Detection ................................................... K. Liu, N. Luo, A. Li, Y. Tian, H. Sajid, and H. Chen XXXX
A Modulation Classification Algorithm for Multipath Signals Based on Cepstrum ........................................... Z. Xing and Y. Gao XXXX
Multiexposure Estimation and Fusion Based on a Sparsity Exposure Dictionary ........................................ Y. Yang, J. Wu, S. Huang, and P. Lin XXXX
Scattering Key-Frame Extraction for Comprehensive VideoSAR Summarization: A Spatiotemporal Background Subtraction Perspective .......................................................... Y. Zhang, D. Zhu, H. Bi, G. Zhang, and H. Leong XXXX
Segmentation of Breast-Region in Breast Thermogram Using Arc-Approximation and Triangular-Space Search ........................................ S. Pramanik, S. Ghosh, D. Bhattacharjee, and M. Nasipuri XXXX
An Ultrahigh-Speed Object Detection Method With Projection-Based Position Compensation .............................................. J. Li, X. Long, D. Xu, Q. Gu, and I. Ishii XXXX

Phase-Based Noncontact Vibration Measurement of High-Speed Magnetically Suspended Rotor ... C. Peng, C. Zeng, and Y. Wang XXXX

Dynamic Synchronphasor Estimation by Extended Kalman Filter ........................................ R. Ferrero, P. A. Pegoraro, and S. Toscani XXXX

Uncertainty Analysis, Accuracy, Precision and Parameter Estimation
Effects of Multiple Influence Quantities on Rogowski-Coil-Type Current Transformers ... A. Mingotti, L. Peretto, and R. Tinarelli XXXX
Geometric Partitioning of Complex Surface Measurements ........................................ A. von Freyberg and A. Fischer XXXX
Experimental Validation of a Data-Driven Step Input Estimation Method for Dynamic Measurements ................................................. G. Quintana Carapia, I. Markovsky, R. Pintelon, P. Z. Csendes, and D. Verbeke XXXX

Built-in Self-Test, Design-for-Testing, Fault Diagnosis and Fault-Tolerance
Nonconvex Group Sparsity Signal Decomposition via Convex Optimization for Bearing Fault Diagnosis .............................................. W. Huang, N. Li, I. Selesnick, J. Shi, J. Wang, L. Mao, X. Jiang, and Z. Zhu XXXX

Imaging Techniques and Instrumentation
ECT Image Reconstruction Based on Alternating Direction Approximate Newton Algorithm ................................................. C. Wang, Q. Guo, H. Wang, Z. Cui, R. Bai, and M. Ma XXXX
A Two-Stage Deep Learning Method for Robust Shape Reconstruction With Electrical Impedance Tomography ................................................................. S. Ren, K. Sun, C. Tan, and F. Dong XXXX
Image Distortion Characterization due to Equivalent Monostatic Approximation in Near-Field Bistatic SAR Imaging ................................................ Z. Manzoor, M. T. Al Qaseer, and K. M. Donnell XXXX

Measurement of Materials and Applications
Complex Permittivity Extraction From Synthetic Aperture Radar Images ................................ Y. Gao, M. T. Al Qaseer, and R. Zoughi XXXX
Characterization of Dielectric Materials at WR-15 Band (50–75 GHz) Using VNA-Based Technique ................................................. Y. Wang, X. Shang, N. M. Rider, T. Huang, and W. Wu XXXX

Medical and Biomedical Instrumentation and Applications
Quantitative Assessment of Spontaneous Breathing in Children: Evaluation of a Depth Camera System ................................................ H. Rehouma, R. Noumeir, S. Essouri, and P. Jouret XXXX

Measurement Techniques
A Novel Approach Based on Trace Resistance Compensation for Summing Networks for High-Current Measurement ................................................................. A. Rodriguez-Echevarria, C. Lopez-Perez, and C. Correa-Betanzo XXXX
Simulation-Based Quantification of Alkali-Metal Evaporation Rate and Systematic Errors From Current-Voltage Characteristics of Langmuir–Taylor Detectors ........................................ E. Sartori XXXX
A Bridge-Balancing Circuit for Balanced Measurement of Resonant Sensors ........................................ H. A. Brauser and J. C. Sit XXXX
A Multiple Leaks’ Localization Method in a Pipeline Based on Change in the Sound Velocity .................................................. X. Lang, P. Li, Y. Guo, J. Cao, and S. Lu XXXX

(Contents Continued on Page XXXX)
A Force Measurement System for HTS Maglev Studies .............................................................. Y. Wen, Y. Xin, W. Hong, and C. Zhao
Study on Internal Detection in Oil–Gas Pipelines Based on Complex Stress Magnetomechanical Modeling ................................................................. B. Liu, S. Zheng, L. He, H. Zhang, and J. Ren
Automatic Measurement System of Section Geometry Parameters for Composite Filter Rods Based on Machine Vision ........................................... X. Yin, M. Yin, L. Xie, and G. Yin
A Low-Power Tunable Square-Wave Generator for Instrumentation Applications ................................................................. A. Panda, A. Kumar Singh, R. Tirupathi, and S. K. Kar

Metrology, Standards and Calibration
Reference Load for Power Analyzer Phase Adjustment and Calibration up to 150 kHz .................. M. Schönecker-Baumlmann

Nondestructive Evaluation and Remote Sensing
Investigation on Time-to-Peak Feature Insensitive to Liftoff Effect for Pulsed Eddy Current Evaluation ............................................................. P. Yang, M. Fan, B. Cao, and S. Gao

Optical Instrumentation, Measurement and Systems
An 8-ch LiDAR Receiver Based on TDC With Multi-Interval Detection and Real-Time In Situ Calibration ................................................................. D. Li, M. Liu, R. Ma, and Z. Zhu
Empirical Modeling of Contact Intermodulation Effect on Coaxial Connectors ................................ X. Chen, Y. He, M. Yu, D. J. Pommereken, and J. Fan
Noise in an FM-Converted Self-Mixing Interferometer ............................................................. M. Norgia, V. Contreras, and S. Donati

RF, Microwave, Millimeter Wave and Tera-Hertz
A Reformulation and Sensitivity Analysis of TRL .............................................................. W. Zhao and Y. Wang
Designing Resonance Microwave Cavities to Optimize Plasma Generation ................................................................. A. Megía-Macías, E. Barrios-Díaz, J.-L. Jauberteau, I. Jauberteau, and O. D. Cortázar

Sensors, Sensor Fusion and Transducers
Constrained MEMS-Based GNSS/INS Tightly Coupled System With Robust Kalman Filter for Accurate Land Vehicular Navigation ................................................................. D. Wang, Y. Dong, Z. Li, Q. Li, and J. Wu
Attitude Estimation Using Inertial and Magnetic Sensors Based on Hybrid Four-Parameter Complementary Filter ................................................................. Y. Suh
Liquid Flow Measurement Using Silicone Polymer Wedge Clamp-On Ultrasonic Transducers ................................................................. Z. Li, F. Hughes, N. C. Kerr, R. Wilson, and S. Dixon
Robust Localization Using IMM Filter Based on Skew Gaussian-Gamma Mixture Distribution in Mixed LOS/NLOS Condition ................................................................. W. Youn, Y. Huang, and H. Myung
Online Temporal Calibration Based on Modified Projection Model for Visual-Inertial Odometry ................................................................. Y. Liu and Z. Meng

Signals, Systems and System Identification
Tool Wear Estimation in End Milling of Titanium Alloy Using NPE and a Novel WOA-SVM Model ................................................................. D. Kong, Y. Chen, N. Li, C. Duan, L. Lu, and D. Chen
Vegetation High-Impedance Faults’ High-Frequency Signatures via Sparse Coding … D. P. S. Gomes, C. Ozansoy, and A. Ulhaq

Time and Frequency Domain Circuits and Systems
On-Chip System for Fast, High-Range, High-Precision Measurements of Delays ............................................ P. C. Serra and J. W. Conklin
FPGA Implementation of a Synchronization Circuit for Arbitrary Trigger Sequences ................................................................. D. Russo and S. Ricci

Virtual Measurements and Systems and Synthetic Instrumentation
