SPECIAL ISSUE ON CPEM 2012

FOREWORD
Report to TIM Editor on CPEM 2012 ................................................................. D. G. Jarrett

GUEST EDITORIAL
Guest Editorial ........................................................................................................... G. R. Jones

SPECIAL ISSUE PAPERS

**Algorithms, Artificial Intelligence, SOFT Computing, and Informatics**

**Analog and Digital Data, Image, and Signal Processing**

**Instrumentation for and Measurement in Communications**
Traceable Measurement of Source and Receiver EVM Using a Real-Time Oscilloscope .................................................................. D. A. Humphreys and J. Miall

**Instrumentation for and Measurement of Electric Power Systems, Energy Metering, and Electric Power Quality**
Calibration of Phasor Measurement Unit at NIST ................................................... Y.-h. Tang, G. N. Stenbakken, and A. Goldstein
Switching Sampling Power Meter for Frequencies up to 1MHz ................................ E. Houtzager, G. Rietveld, and H. E. van den Brom

**Uncertainty Analysis, Accuracy, Precision, and Parameter Estimation**
High-Accuracy Estimations of Frequency, Amplitude, and Phase With a Modified DFT for Asynchronous Sampling .......................................................... T. Yamada
Uncertainty Estimate Associated With the Electric Field Induced Inside Human Bodies by Unknown LF Sources ................................ O. Bottauscio, M. Chiampi, G. Crotti, D. Giordano, W. Wang, and L. Zilberti
Improvement of Formula and Uncertainty of the Reference Magnetic Field for AC Magnetometer Calibration ................................................... M. Ishii, R. Ketzler, M. Albrecht, S. Kurokawa, and Y. Shimada

(Contents Continued on Page xxxx)
Measurement of Materials and Applications

Optimization of Mn$_3$Ag$_{1-x}$Cu$_x$N Antiperovskite Compound Fabrication for Resistance Standard
T. Oe, C. Urano, M. Hadano, A. Ozawa, K. Takenaka, and N.-h. Kaneko

Graphene Epitaxial Growth on SiC(0001) for Resistance Standards

Native Graphene Oxides at Graphene Edges
S. Shimamoto, Y. Naitou, Y. Fukuyama, S. Kiryu, and N.-h. Kaneko

Measurement Techniques

A New NVNA Phase Reference for Polyharmonic Intermodulation Measurements
Y. Zhang and M. Lin

Development of a Measurement Setup for High Impulse Currents
D. Istrate, I. Blanc, and D. Fortuné

The Evaluation of Phasor Measurement Units and Their Dynamic Behavior Analysis
H. Liu, T. Bi, and Q. Yang

Magnetic Shielding Effectiveness of Current Comparator
H. Shao, K. Qu, F. Lin, B. Liang, K. Jia, Q. Ren, Y. Li, and W. Li

Metrology, Standards, and Calibration

Fundamental Constants

Status of the BIPM Watt Balance
H. Fang, A. Kiss, E. de Mirandès, J. Lan, L. Robertsson, S. Solve, A. Picard, and M. Stock

Current State of Avogadro $^{38}$Si sphere S8
R. A. Nicolaus, G. Bartl, H. Bettin, M. Borys, M. Firlus, I. Busch, A. Felgner, R. Krüger-Sehm, M. Krumrey, M. Krystek, and U. Kuetgens

Elimination of Mass-Exchange Errors in the NRC Watt Balance
C. A. Sanchez, B. M. Wood, D. Inglis, and I. A. Robinson

Johnson Noise Thermometry Measurement of the Boltzmann Constant With a 200 Ω Sense Resistor
A. Pollarolo, T. Jeong, S. P. Benz, and H. Rogalla

Flat Frequency Response in the Electronic Measurement of Boltzmann’s Constant
J. Qu, Y. Fu, J. Zhang, H. Rogalla, A. Pollarolo, and S. P. Benz

Design of the Permanent-Magnet System for NIST-4
S. Schlamminger

Mutual Inductance Measurement of the Superconducting Coil for the Joule Balance
Z. Li, G. Wang, S. Li, J. Lan, B. Han, Y. Lu, Z. Zhang, and Q. He

Time and Frequency

Dissemination of UTC(NICT) by Means of QZSS

Uncertainty Evaluation of $-100$-dBc/Hz Flat Phase Noise Standard at 10 MHz
S. Yanagimachi, K.-i. Watabe, T. Ikegami, H. Iida, and Y. Shimada

Comparison of Frequency Standards Used for TAI
G. Petit and G. Panfilo

Providing $10^{-16}$ Short-Term Stability of a 1.5-μm Laser to Optical Clocks
C. Hagemann, C. Grebing, T. Kessler, S. Falke, N. Lemke, C. Lisdat, H. Schnatz, F. Riehle, and U. Sterr

Realize a Frequency Stability Measurement System with PTP
T.-K. Wang, F.-R. Chang, and S.-Y. Lin

Optical Lattice Clocks as Candidates for a Possible Redefinition of the SI Second

Noise and Correlation Study of Quantum Hall Devices
J. Schurr, F. Ahlers, and L. Callegaro

Voltage

Quantum Calibration System for Digital Voltmeters at Voltages from 10 nV to 1 kV
D. Georgakopoulos, I. Budovsky, S. Grady, and T. Hagen

Differential Sampling Measurement of a 7 V RMS Sine Wave With a Programmable Josephson Voltage Standard
A. Räpfenacht, C. J. Burroughs, Jr., P. D. Dresselhaus, and S. P. Benz

A Bias Source for the Voltage Reference of the BIPM Watt Balance
S. Solve, R. Chayramy, and M. Stock

A Simple Build-Up Method for the DC Voltage Scale of a Source

The North American Josephson Voltage Interlaboratory Comparison
H. V. Parks, Y.-h. Tang, P. Reese, J. Gust, and J. J. Novak

Comparison of Nonquantum Methods for Calibration of the Digital Source of Very-Low-Frequency AC Voltage
M. Kampik

Low-Frequency Characterization in Thermal Converters Using AC-Programmable Josephson Voltage Standard System
Y. Amagai, M. Maruyama, and H. Fujiki
Method for Ensuring Accurate AC Waveforms with Programmable Josephson Voltage Standards

Combining Josephson Systems for Spectrally Pure AC Waveforms With Large Amplitudes

Direct Comparison of Josephson Voltage Standards at 10 V Between BIPM and CENAM

Wideband High Stability MEMS-Based AC Voltage References

Current

Measurement of the Phase Angle Errors of High Current Shunts at Frequencies up to 100 kHz

Using a Current Loop and Homogeneous Primary Winding for Calibrating a Current Transformer

Determination of Equivalent Inductance of Current Shunts at Frequency Up to 200 kHz

Research on High Accuracy Current Comparator and Self-calibration Methods

Evaluation of a 100 A Current Shunt for the Direct Measurement of AC Current

Power

Estimating Parameters of Complex Modulated Signals from Prior Information about Their Arbitrary Waveform Components

Polyharmonic Digital Synthesizer for the Calibration of Phase Sensitive Measuring Systems up to the Ultrasonic Band

High-Current CT Calibration Using a Sampling Current Ratio Bridge

Low-Frequency Quantum-Based AC Power Standard at NRC Canada

An Improved Current-Comparator-Based Power Standard With an Uncertainty of 2.5 μW/VA (k = 1)

Comparison Between Thermoelectric and Bolometric Microwave Power Standards

Current Ratio Transfer Standard and Improved Equivalent Ampere Turn Method

Resistance

Low-Ohmic Resistance Comparison: Measurement Capabilities and Resistor Traveling Behavior

10 x 10 GΩ Guarded Hamon Network for the Modified Wheatstone Bridge for High Value Resistors Calibration

Robust Control of a Two-Terminal Cryogenic Current Comparator

First Attempt to Develop an On-Chip Double-Shielded QHR Device for Use in AC Measurements

Resistance Scaling From 10 kΩ up to 100 TΩ with New Designs of Hamon Transfer Devices

New Design of Quantized Hall Resistance Array Device

Automated High-Ohmic Resistance Bridge with Voltage and Current Null Detection

Impedance

An Impedance Spectrometer for the Metrology of Electrolytic Conductivity

A Digitally Assisted Current Comparator Bridge for Impedance Scaling at Audio Frequencies

Characterization of 100-Ω Metal Foil Standard Resistors
A High-Resolution PXI Digitizer for a Low-Value-Resistor Calibration System .................................................. R. Rybski, J. Kaczmarek, and M. Kozioł

Improvement of High-Value Capacitance Measurement ........ D. Dongxue, H. Xiaobing, W. Wei, and L. Yanqiang

RF, Microwave, Millimeter Wave, and Tera-Hertz

Validation of Power Linearity in Terahertz Time-Domain Spectroscopy Using a Programmable Step Attenuator ........ H. Iida, M. Kinoshita, Y. Shimada, H. Kuroda, K. Kitagishi, and Y. Izutani

Optimization of the Atomic Candle Signal for the Precise Measurement of Microwave Power ........................................... M. Kinoshita, K. Shimaoka, and Y. Shimada

Metrological Traceability in Waveguide S-parameter Measurements at 1.0 THz Band ........ M. Horibe and R. Kishikawa

A Broadband Waveguide Calorimeter in the Frequency Range From 50 to 110 GHz .................................................. K. Shimaoka, M. Kinoshita, and T. Inoue

Generic Model and Case Studies of Microwave Power Sensor Calibration Using Direct Comparison Transfer ........ Y. Shan, Y. S. Meng, and Z. Lin

Time-Domain Characterization of the Surge, EFT/Burst, and ESD Measurement Systems ........................................... C. F. M. Carobbi, A. Bonci, M. Stellini, and M. Borsero

Establishment of S-parameter Traceability for 3.5 mm Coaxial Lines from 10 MHz to 100 MHz ................... R. Kishikawa, M. Shida, and M. Horibe

Sensors, Sensor Fusion, and Transducers

Development of Thin-Film Multijunction Thermal Current Converters With Increased Rated Current .... H. Fujiki

Sensitivity Optimization of Epitaxial Graphene Based Gas Sensors ..................................................... S. Novikov, A. Satrapinski, N. Lebedeva, and I. Iisakka

ERRATA

Erratum to “Optimum Two-Dimensional Uniform Spatial Sampling for Microwave SAR-Based NDE Imaging Systems” .................................................................

Erratum to “Material Characterization Using Complementary Split-Ring Resonators” .................................
