

Procedure for Closing a TC

A resolution is adopted by TSAC at the proposal of the TSAC Vice-President (VP).

An existing IMS TC will be closed at the proposal of the TSAC VP approved by the AdCom (either during the AdCom regular meetings or by electronic vote), if the following procedure has been carried out without success.

Looking at the annual activity report submissions, the TSAC VP verifies that:

- a) the TC has less than 7 members for three consecutive years or
- b) at least two of the following conditions are not satisfied for three consecutive years

TC should technically [co-]sponsor at least one workshop, or organize a special session at an IMS conference, or work on standard development.

TC should maintain the web space with currently relevant information (<http://tcX.ieee-ims.org/>)

TC should hold at least 2 [e-]meetings /events in the past year;

The TSAC VP contacts the Chair of the TC asking to submit a revitalization plan within a deadline.

The deadline passes without a satisfactory revitalization plan being submitted. The evaluation of the revitalization plan is made within the TSAC.
