

IEEE OPEN JOURNAL OF INSTRUMENTATION AND MEASUREMENT

Introducing the Open Access Journal of the
IEEE Instrumentation and Measurement Society

In keeping with the needs of our authors, including those who are obligated by their funding agencies to publish their research results as Open Access, the IEEE Instrumentation and Measurement Society (IMS) is excited to announce the launch of the IEEE Open Journal of Instrumentation and Measurement (IEEE OJIM), IMS's Gold Open Access journal.

OJIM covers all instrumentation and measurement topics, including methods, instruments, systems, and applications for measurement, detection, tracking, monitoring, characterization, identification, sensing, estimation, recognition, or diagnosis of a physical phenomenon; or metrology and measurement theory including measurement uncertainty, instrument accuracy, calibration, etc.

In addition to regular papers, OJIM will also publish short papers and survey/review papers. Short papers are 3- and 4-page papers that are reviewed faster than regular papers, providing authors with a means for rapid publication of novel, significant and time-sensitive articles. Survey/review papers review the existing literature on a specific topic, and present further contributions such as a novel taxonomy that will guide other researchers, deep analysis with new findings that were previously unknown, or identifying gaps and providing new insights.

We invite you to be among the first to have your article peer-reviewed and published in OJIM. This is an exciting opportunity for your research to benefit from the high visibility and interest the journal's marketing launch by IEEE and the IMS will generate, and for your work to be seen freely as Open Access by the research community.

Submissions will open September 1, 2021.

Please check the website for more info.

Submit:

- Regular paper
- Short paper
- Survey/review paper
