

Special Issue of Technically Extended papers from AUTOTESTCON 2024

in IEEE *Instrumentation & Measurement Magazine*, to be published in November 2025

All authors of papers that were accepted, registered, and presented at **AUTOTESTCON 2024**, and which will appear in the AUTOTESTCON proceedings in IEEE Xplore, are eligible to submit a **technically extended** version of their work to the Special Issue on AUTOTESTCON 2024 to the IEEE *Instrumentation & Measurement Magazine*.

Important Note about Article Format, Scope and Deadlines

A technically extended paper does not mean that the paper must be longer. The article should be 3500 to 4000 words, with a maximum of 6 figures and 10-12 references.

The article must be framed in the proper context of Instrumentation & Measurement, otherwise, it will be rejected immediately without going to review.

The article **MUST** be technically extended from the AUTOTESTCON proceedings paper. The IEEE *Instrumentation & Measurement Magazine* considers only technical extensions, not grammatical extensions. Providing more explanation of the same technical thing(s) presented in the AUTOTESTCON proceedings paper is **NOT** a technical extension.

Articles must comply with the [Authors Submission Guidelines](#).

Preparation for Submission to the Special Issue

When your paper is ready, please submit it completely before March 31, 2025 through <https://www.editorialmanager.com/IMM/default.aspx>

1. Upload the article, and make sure to select “November 2025: AUTOTESTCON 2024.”
2. Upload a copy of the AUTOTESTCON proceedings paper.
3. Upload a Statement from the Authors, which must provide a list of the technical extensions.
4. If the authorship of the magazine article is different from the submitted Magazine article, an additional statement from the Authors is required to state the reason for the removal or addition of the author(s). If author(s) were removed, a signed statement is required for any removed author stating that they agree to be removed from authorship of the Magazine article. If author(s) were added, their contribution to the technical extension must be explicitly clarified.
5. Please include a cover letter in which you specify that this paper has been submitted for the SI on AUTOTESTCON 2024.

Schedule: The deadline for submission to the Special Issue is **March 31, 2025**.
